Joined: 28 Jan 2005 Posts: 30	<p>I was wondering how the locksmiths open this kind of lock. Its called the Tri Teq system using a remote control to open the lock. I heard that these new locks are on the pepsi and coke machines in the US. Are there any locksmiths out there that have ran into this type of lock yet. I would like to know if there is a way to pick or send infrared signals to these types of locks. Any help with this type of lock would be appreciated.</p>
