# Install and Register the Client

### **Prerequisites**

#### A. Operating System:

- Windows XP, Windows 7 or Windows 10 Professional or Enterprise Editions

- .NET Framework version 4 - Full Profile (not only client profile).

- Most recent patches/updates from Microsoft for the .NET Framework are installed (including KB2468871).Net Framework 4.0 Extended Client.

#### **B. USB or Serial Cradle**

#### C. Connection to TriTeq Registration Server (optional)

Although this is optional, connection to our registration server is highly recommended as it will speed the registration process and eliminate errors. The "Network Tester" software can be downloaded from the TriTeq website and the firewall can be configured to allow access. After registration is complete, the connection can be severed, and the firewall can be restored to the prior settings.

## Installation

Device Driver Installation Wiza	rd
	Welcome to the Device Driver Installation Wizard! This wizard helps you install the software drivers that some computers devices need in order to work.
	To continue, click Next.
	< Back Next > Cancel
	Completing the Device Driver Installation Wizard The drivers were successfully installed on this computer. You can now connect your device to this computer. If your device came with instructions, please read them first.
